CONTENTS OF VOLUME 25

NUMBER 1

A reduced-order causal observer-based controller for singular systems
A. AILON 1

Stability of analogue neural classification networks
E. NOLDUS, R. VINGERHOEDS and M. LOCCUFIER 19

Two-stage algorithm for the linear approximation of large-scale interconnected steady-state systems
Z. HASIEWICZ 33

Stabilizing uncertain discrete-time systems by observer-based control
W. CHAI, NAN K. LOH and A. N. POO 47

Using linear feedback laws to augment the quadratic estimates of the stability region of a non-linear system
FENG-HSIAO HISAO, JER-GUANG HSIEH and CHIA-YUAN DENG 65

Decentralized H^{∞} controller design for large-scale systems
CHENG-FA CHENG, WEN-JUNE WANG and YU-PING LIN 83

Nearly decoupled robust MIMO control of an unstable plant
M. H. PERNG and T. S. LEE 97

Cross-/auto-correlation of time-varying signals using block pulse functions and determination of power spectral densities
A. DEB, G. SARKAR, S. K. SEN and A. K. DATTA 113

Cascade non-linear system identification by a non-parametric method
W. GREBLICKI and M. PAWLAK 129

Multi-stage Monte Carlo and non-linear test problems
W. CONLEY 155

Balanced realization of non-minimal MIMO discrete-time systems
R. W. ALDAHERI and A. H. BAMANI 173

Risk-sensitive optimal investment policy
M. LEFEBVRE and P. MONTULET 183

Mapping of continuous-time control SISO systems to their equivalents with stable discrete controllers
J. NOWAKOWSKI and P. SUCHOMSKI 193

Correspondence
Comment on 'Stabilization of large-scale non-linear infinite delay systems' 201
DAO YI XU .....

NUMBER 2

Dynamics and stabilization of a flexible orbiting spacecraft with a rigid tip body
ZHENG-HUA LUO and YOSHIYUKI SAKAWA 205

Non-linear control algorithm for robot manipulators
A. S. C. SINHA and H. O. YURTSEVEN 225

Modelling and control of a deformable-link flexible-joint robot
S. GOGATE and Y.-J. LIN 237

Heuristic two-layer control structure for a class of transportation systems
T. A. STOILOV and A. E. GEGOV 253

Adaptive controller for systems with internal point delays providing asymptotic stability
M. DE LA SEN 269

Optimal synchronization of discrete event dynamic systems via timed marked graphs
M. OHKAWA, S. KATAOKA and T. YAMADA 291

Regional observability of distributed systems
M. AMOUROUX, A. EL JAI and E. ZERRIK 301

Continuous-time saturated state feedback regulators: theory and design
C. BURGAT, S. TARBOURIECH and M. KLAI 315

Extension of the Dahlin–Higham controller to multivariable systems with time delays
F. C. TENG, G. F. LEDWICH and A. C. TSOI 337

Block pulse functions, the most fundamental of all piecewise constant basis functions
A. DEB, G. SARKAR and S. K. SEN 351

Economic scheduling of a new order in a job-shop production system
A. GUNASEKARAN, S. K. GOYAL, T. MARTIKAINEN and P. YLI-OLLI ... 365

Adaptive generalized analytical predictor
HSIAO-PING HUANG, HUEI-SHYANG YOU and CHI-PING CHANG 377

Linear quadratic optical control problems via shifted Legendre state parametrization
M. RAZZAGHI and G. N. ELNAGAR 393

0–1 Quadratic programming approach for optimum solutions of two scheduling problems
B. ALIDAEE, G. A. KOCHENBERGER and A. AHMADIAN 401

NUMBER 3

Performance bounds of discrete-time LQ systems with structures uncertainties
X. F. ZHANG, J. S. LUO and A. JOHNSON 409

System identification and on-line robust control of a multivariable system
WEN-TENG WU, CHING-GUEY TSENG and Y. T. CHU 423

Design of a deterministic controller with internal model principle for uncertain linear systems
CHANGYUN WEN and YOUYI WANG 441

Model-based generation of knowledge for autonomous systems
E. SZCZERBICKI 453

Dynamic data systems approach to forecasting supply of petroleum products in the Kingdom of Saudi Arabia
F. A. BURNEY, M. M. AL-IDRISI and A. ABDULAZIZ 473

Robust design criteria for active control of flexible systems
CHUN-LIANG LIN 483

Analysis of data loss rates in finite communication buffers with semi-Markov producers and consumers
M. A. BASSIOUNI 503

Single facility location problem with region-dependent distance metrics
M. PARLAR 513

Common-cause failure analysis of a redundant system with repairable units
B. S. DHILLON and O. C. ANUDE 527

Vertex results for uncertain systems
LONG WANG and LIN HUANG 541

Robust $\mathscr{D}$-stability of the interval polynomial set and robust $\mathscr{D}$-stabilization of the interval rational function set 551
LONG WANG and LIN HUANG
Optimal stopping and control with two kinds of boundary conditions: application to dynamic routeing in networks
Y. YAVIN ... 571
Optimal selection policy for a flexible manufacturing cell using optimal stochastic switching
Y. YAVIN ... 581
Improved optimal algorithms for scheduling unit-length independent tasks on uniform machines
A. TRIANTAFYLLAKIS and S. TZAFESTAS ... 591
Characterization of dynamic system nonlinearities via probabilistic approach
H. E. EMARA-SHABAIK and K. A. F. MOUSTAFA ... 603
Class of absolutely stable multivariable systems
M. I. GIL' ... 613

NUMBER 4

Computation of aircraft geometric height under radar surveillance for non-level flights
D. E. MANOLAKIS ... 619
Robust tracking control or rigid-link electrically-driven robots
J. GULDNER, J. J. CARROLL, D. M. DAWSON and Z. QU ... 629
Pulse width modulated control of the full bridge buck converter
H. SIRA-RAMIREZ and M. T. PRADA-RIZZO ... 651
Designing the Hopfield neural network via pole assignment
KING-WAH E. CHU and NIAN LI ... 669
Image tracking for a partially shaded noisy manoeuvring target
YUNG-TSAN LIN, BOR-LEH JENGE, HSUEN-CHYUN and SHYU-MIN CHIANG ... 683
Performance of hypercube architecture with shared memory
V. TIRUVEEDHULA and J. S. BEDI ... 695
Model reduction via near-uncontrollability and near-unobservability decomposition
HSU SHAO-KANG and XU JIE ... 707
Software reliability growth models based on cluster point processes
PANLOP ZEEPHONGSEKUL, GUOLIN XIA and SANTOSH KUMAR ... 737
Global stabilization of non-linear singularly perturbed systems with fast actuators: exact design manifold approach
CHUNG-CHENG CHEN, JER-GUANG HSIEH and JUHNG-PERNG SU ... 753
Integral-equation approach to parameter identification without consideration of initial conditions
ZI-JIANG YANG, TERUO TSUJI and SETSUO SAGARA ... 763
Optimal programs and their price characterization in a multisector growth model with uncertainty
N. S. PAPAGEORGIOU ... 775
Discontinuous optimization in a class of multi-stage production systems
S. K. GOYAL, A. GUNASEKARAN, T. MARTIKAINEN and P. YLI-OLLI ... 789
Dynamic image modelling by neural networks
S. BHAMA, H. SINGH and D. KAUR ... 803
Tracking approach in hierarchical optimization of large-scale systems
H. SIDAOUI, Z. BINDER and R. PERRET ... 813

Stochastic control of an epidemic process
HAIYAN CAI and XIAOLONG LUO 821

An efficient integer programming model of the dynamic lot-sizing problem
CHAO-HSIEN PAN and CHING-JONG LIAO 829

NUMBER 5

Guest Editorial 837

The current state of the debate

Perspective on the current state of macroeconomic theory
W. A. BARNETT 839

Expectations, learning and empirical macroeconomic models
D. CURRIE and S. HALL 849

Some stock market asset prices and returns anomalies

Asset prices and the fundamentals: a Q test
R. CRAINE 871

Modelling and testing for market volatility
J. K. SENGUPTA and R. E. SFEIR 881

Exchange rate fluctuations and appropriate monetary policies

Are currency devaluations necessarily bad? New Keynesian arguments for intervention rather than monetarist orthodoxy
A. HUGHES HALLETT and YUE MA 893

The European Exchange Rate Mechanism as a macroeconomic destabilizer
P. MINFORD 909

The monetary approach to the balance of payments and the IMF model of financial programming
R. SAU 929

Nonlinearities in key U.S. aggregates

Hysteresis and cyclical variability in real wages, output and unemployment: empirical evidence from nonlinear methods for the United States
D. A. PEEL and A. E. H. SPEIGHT 943

NUMBER 6

Multilevel intelligent fuzzy control of oversaturated urban traffic networks
A. GEGOV 967

Fuzzy control of a manipulator using the switching motion of brakes
YOSHIHARU OHTANI and TOSHIO YOSHIMURA 979

State analytical predictor for systems with multiple time delays
HSIAO-PING HUANG and HUEI-SHYANG YOU 991

Analysis of an electrohydraulic servo system subject to Stribeck-type friction
JIH-HUA CHEN and WEN-CHE FU 1015

Balanced realization and model reduction of singular systems
K. PEREV and B. SHAFAI 1039

Robust observer synthesis for nonlinear large-scale systems
CHENG-FA CHENG, WEN-JUNE WANG and YU-PING LIN 1053

An efficient robust adaptive controller for robotic arms in the presence of time-varying parameters
CHUN-YI SU and Y. STEPANENKO 1067

Disturbance rejection of time-delay systems
JAIME ALVAREZ-GALLEGOS and JOAQUÍN ALVAREZ-GALLEGOS 1081

Sensitivity analysis for systems with structured uncertainty
Z. SHAO and M. E. SAWAN 1093

An algorithm for the estimation of systematic errors in radar measurements
C. M. REKKAS, K. KYRIAKOPOULOS and N. J. KRIKELIS 1105

NUMBER 7

Pole assignment in a specified circular region using a bilinear transformation onto the unit circle
A-A. A. ABDUL-WAHAB 1113

New approach for automated inspection and feedback control systems
C. M. KLEIN and LIH-REN HSIU 1127

Global output tracking for a class of single-input single-output non-linear systems
A. TORNAMBÈ 1145

A general efficient approach to dynamic analysis of interconnected mechanical systems using the theory of connections
KESHENG WANG and Ø. BJØRKE 1157

Iterative learning control for discrete-time nonlinear systems
TAE-JEONG JANG, HYUN-SIK AHN and CHONG-HO CHOI 1179

Model reduction via least-squares Padé simplification of squared-magnitude functions
L. A. AGUIRRE 1191

Modelling the lead-lag effect between dual-class shares
T. MARTIKAINEN, J. PERTTUNEN, P. YLI-OLLI and A. GUNASEKARAN .. 1205

Generalized optimization method for pattern recognition
T. HORIUCHI, K. TORAICHI, K. YAMAMOTO and H. YAMADA 1213

Neural networks synthesis based on stochastic approximation algorithm
K. NAJIM and M. CHTOUROU 1219

Correspondence

More questions than answers: an examination of "To drill or not to drill: a synthesis of experts' judgments"
M. A. A. COX 1223

NUMBER 8

Synthesis of optimal feedback controller by neural networks
C. J. GOH and N. J. EDWARDS 1235

Adaptive manipulator trajectory control using neural networks
L. BEHERA and M. GOPAL 1249

Dual contingency plans in optimal generalized linear designs
YONG SHI and ZESHENG HE 1267

Schúr stability of uncertain polynomials: some extreme point results
Y. C. SOH and Y. K. FOO 1293

Localization of unknown sources for parabolic systems on the basis of available observations
A. Y. KHAPALOV 1305

Robust adaptive control with internal model principle
GANG FENG 1323

Evaluating dynamic efficiency by optimal control
J. K. SENGUPTA 1337

Robust stability of perturbed linear continuous time systems with L_1 uncertainties
C. B. SOH 1355

Duality and lower bounds in optimal stochastic control
SHINJI TANIMOTO 1365

NUMBER 9

Output-sliding control design of multivariable systems
YING J. HUANG and KAI S. YEUNG 1373

Temperature control of a water bath by self-tuning PI controller
R. YUSOF, S. OMATU and M. KHALID 1391

Schur stability of interval polynomials
J. KOGAN 1405

Pole assignment at infinity and polynomial matrix equations
CHUN-HSIUNG FANG 1417

Incentive strategies dealing with uncertainty about the follower's MCDM behaviour
KYOICHI KIJIMA and CHUNHUI XU 1427

Application of output structural controllability to a thermally integrated distillation sequence
X. LIN, R. B. NEWELL, P. L. DOUGLAS and S. K. MALLICK 1437

Genetic algorithm approach to a production ordering problem in an assembly process with constant use of parts
NOBUO SANNOMIYA, HITOSHI IIMA and NAOKO AKATSUKA 1461

Some generalizations on the ultimate boundedness control of uncertain systems
CHUNG-CHENG CHEN, JER-GUANG HSIEH, JYH-HORNG HUANG and JUHNG-PERNG SU 1473

Determination of the inverse system using differential operator representation
Y. M. SMAGINA 1489

Recursive methods for parameter estimation of linear lumped systems using Hermite polynomials
A. T. MATHEW, A. N. JHA and V. S. RAJAMANI 1505

Non-parametric identification with errors in independent variables
E. RAFAJŁOWICZ 1513

NUMBER 10

Robust strict positive realness design of interval systems
YINGMIN JIA, WEIBING GAO and MIAN CHENG 1521

Averaging analysis of model reference adaptive identifier using least-square algorithm
JU-JANG LEE and HEUNG-YEUNG SHUM 1535

Decoupling and stabilization of large-scale power systems by a geometric graph-theoretic method
M. BRUCOLI, L. CARNIMEO and M. TROVATO 1553

Decentralized state estimation in large-scale systems
M. S. AHMED 1577

Robust control for a constantly rising temperature system (H^∞ control approach)
SHIRO TAMAKI, HIDEYUKI YAMAGUCHI, TETSUHIKO YAMAMOTO, HIROSHI KINJO, EIHO UEZATO, NAOKI OSHIRO, HATSUO TAIRA and AKIRA TANAHARA 1593

Stochastic activity networks: a four-parameter approach for completion times
C. SOMARAJAN and HON-SHIANG LAU 1607

A control scheme robust against all parameter variations and disturbances
Y. J. HUANG and K. S. YEUNG 1621

New model reduction scheme for bilinear systems
S. A. AL-BAIYAT, M. BETTAYEB and U. M. AL-SAGGAF 1631

Lot size variability effects on manufacturing lead time
C. P. KOULAMAS 1643

Second-order system models of high-order plants
M. PACHTER, J. J. D'AZZO and L. E. BUZOGANY 1653

NUMBER 11

Analysis and optimal control of time-varying systems via Fourier series
CHING-YU YANG and CHAÓ-KUANG CHEN 1663

Uniform disturbance localization with simultaneous uniform decoupling for linear time-varying analytic systems
K. G. ARVANITIS 1679

Chaos and bifurcation in numerical computation by the Runge–Kutta method
KAZUMASA HIRAI and TOMOHIKO ADACHI 1695

Parametrized relaxation for evolution inclusions of the subdifferential type
N. S. PAPAGEORGIOU 1707

Fuzzy sets in urban design
S. KUMAR and S. GOEL 1727

Modelling and prediction using GMDH networks of Adalines with nonlinear preprocessors
D. T. PHAM and X. LIU 1743

Dynamic consumer demand: a comparison of monopolistic and oligopolistic intertemporal market equilibria
F. WIRL 1761

Analysis of fractionally damped flexible systems via a diffusion equation
B. MBODJE, G. MONTSENY and J. AUDOUNET 1775

High-gain PI natural tracking control for exponential tracking of linear MIMO systems with state-space description
W. P. MOUNFIELD JR and L. T. GRUJIĆ 1793

On coprime factorization and minimal realization of transfer function matrices using pseudo-observability concept
N. F. AL-MUTHAIRI and S. BINGULAC 1819

An algorithm for the constrained regulation of linear systems
E. GRAVALOU and G. BITSORIS 1845

Recursive time delay estimation method
CS. BÁNYÁSZ and L. KEVICZKY 1857

Robust estimation and compensation for actuator and sensor failures in linear systems
Q. XIA, M. RAO, S. X. SHEN and V.-G. GOURISHANKAR 1867

On Lyapunov stability robustness bounds for linear discrete-time systems with structured time-varying uncertainty
J. S. Luo, A. Johnson and P. P. J. van den Bosch 1877

The linear-quadratic optimal regulator for continuous-time descriptor systems: a dynamic programming approach
Hua Xu and Koichi Mizukami 1889

Modelling the cross-sectional variation of E/P ratios: implications for the E/P anomaly
T. Martikainen and A. Gunasekaran 1899

A generalized exchange heuristic for the capacitated vehicle routing problem
F. Harche and P. Raghavan 1911

Portfolio selection in downside risk optimization approach: application to the Hong Kong stock market
B. R. Feiring, Wuilam Wong, Maychi Poon and Yan Chong Chan 1921

Invariance of strict aperiodicity for systems with dependent perturbations
C. B. Soh 1931

Strong resonances and chaos in a stock market model
L. L. Ghezzi and Y. A. Kuznetsov 1941

Robust variable structure model reference adaptive control
Gang Feng 1957

Adaptive control with external model for periodic disturbance rejection
Chu Kwong Chak and Gang Feng 1965

Input rate constrained, continuous-time, indirect, adaptive control
Gang Feng 1977

Optimal intensity allocation of single-server queueing networks
Xiuli Chao 1987

Optimal active pointwise control of thin plates via state-control parametrization
M. L. Blanton and I. S. Sadek 2001

Stability of nonlinear analytic delay equations
Zhang Yi and S. P. Banks 2015

On the existence of solutions of the general algebraic Riccati equation
S. B. Chen, F. E. Zhang, Q. Zhang and L. Wu 2023

Non-parametric identification with errors in independent variables
E. Rafajłowicz 2031

Multi-modal adaptive Kalman filter design for manoeuvring target tracking
H. P. Wang, M. C. Kung and T. Y. Lin 2039

The multichannel quickest-path problem
J. S. Dai, S. N. Wang and X. Y. Yang 2047

Saturated dynamic output feedback for a class of linear discrete-time systems
S. Tarbouriech and C. Burgat 2057

NUMBER 12

Editorial 2063

Digital tracker with output feedback: application to aircraft controls
F. L. Lewis, F. Al-Sunni and B. L. Stevens 2065

Generalized characterization of tracking systems and linear multivariable plants
H. Yamane and B. Porter 2079

Synthesis of limit-tracking systems incorporating linear multivariable plants
H. Yamane and B. Porter 2095

On the one-sided one-block H_∞ problem applied to a sum of sensitivities cost index
D. FRAGOPOULOS and M. J. GRIMBLE 2113

On-line fault detection in uncertain nonlinear systems using diagnostic observers: a survey
P. M. FRANK 2129

Optimal design of meter placement in water distribution systems
GUOPING YU and R. S. POWELL 2155

On the application of the {1}-inverse to the design of general structured unknown input observers
SHAO-KUNG CHANG and PAU-LO HSU 2167

Design of a stable digital output feedback controller for continuous-time input-delay plants
J. S. H. TSAI, CHAO-PENG WEI and LEANG S. SHIEH 2187

Political risk and adjusted present value
YUEH H. CHEN and W. T. LIN 2207

Stability robustness analysis of state-space models for uncertain linear time-varying systems
HONGSHENG XI 2221

Optimal control for large-scale systems: a recursive approach
X. SHEN, Q. XIA, M. RAO and V. GOURISHANKAR 2235

How to control stock markets
A. CONSIGLIO 2245

On the zeros of interconnected positive linear systems
S. MURATORI, C. PICCARDI and S. RINALDI 2255

Performance recovery via a controller's initial state assignment for an output tracking problem
MING-SHENG HWANG and FU-CHING LEE 2265

Robust stability of a class of uncertain nonlinear dynamical systems with time-varying delay
HANSHENG WU and KOICHI MIZUKAMI 2285

Tandem behaviour of a finite-capacity G/M/1 queueing system with instantaneous Bernoulli feedback: an algorithm
P. POURBABAI 2297

A procedure for measuring uncertainties due to lack of information in a fuzzy game theory problem
B. K. MOHANTY 2309

Optimization of econometric dynamic systems
M. A. FKIRIN 2319

Qualitative reasoning for system reconstructiong using Lebesgue discretization
ZHENGXIN CHEN 2329

Some optimization problems for timed marked graphs
T. YAMADA, M. OHKAWA and S. KATAOKA 2339

An autoregressive model that describes the form of a fish school in a circular water tank
M. A. DOUSTARI and N. SANNOMIYA 2349

Stability analysis of cyclical schedule and linear lot sizing rule for a production system
THOMAS YEW SING LEE 2361

Partial least-squares Padé reduction with exact retention of poles and zeros
L. A. AGUIRRE 2377

Modelling and simulation of complex mechanical systems with applications to a steam-generating system—Part 1: Mathematical modelling
S. TARASIEWICZ, J.-C. GILLE, F. LÉGER and P. VIDAL 2393

Modelling and simulation of complex mechanical systems with applications to a steam-generating system—Part 2: Numerical simulation
S. TARASIEWICZ, P. VIDAL, F. LÉGER and J.-C. GILLE 2403

Entropy and information in portfolio choice
J. K. SENGUPTA 2417

Author Index (with titles) 2425
